33 Years of Success

In a small shop thirty-three years ago the original piece of "Clincher" Felt and Wood Weather Strip was developed by the hands of W. J. Dennis. That was the beginning of an international business specializing in the manufacture of weather strip for all purposes.

The original "Clincher" type of strip was protected by Trade Mark and year by year has been refined and perfected until today it is considered the standard by which good weather strip values are measured. Yet, by thus specializing; by employing special manufacturing equipment; and by combining increased sales with mass production, we are at this time able to give you the greatest values of our entire thirty-three years' history.

The Mouldings

Mouldings used in the manufacture of the Genuine Dennis Clincher Wood and Felt Weather Strip are made from kiln dried lumber, which is very essential, for Weather Strip Mouldings made from air dried lumber would have a tendency to warp or separate itself from window stops and door jambs as soon as it came in contact with the steam from radiators or the rays of the sun.

As a further precaution to make our weather strip give satisfactory service in use, the mouldings are coated with a boiled oil stain which prevents them from absorbing moisture. Water stain can be used to give the same appearance, but it will not protect the mouldings and make them stay put after they are applied. The difference in cost between oil stain and water stain needs no explanation but mouldings made out of kiln dried lumber cost 15% more than mouldings made from air dried material.

Felt

The felt used in the Genuine Clincher Wood and Felt Weather Strip is all wool, moth proofed, 32 ozs. to the yard on sizes 70 and 71, and 40 ozs. to the yard on sizes 71½, 74 and 75—a cotton felt can be used as a substitute to reduce the cost but cotton felt is not substantial and elastic and will not stand up and give satisfactory service in use.

Prices

Prices on finished weather strip can be reduced by substituting lower priced or different materials, but merchandise that will not give satisfactory service for the purpose it is intended eventually dies in the market, only quality weather strip that will give service in use will hold the trade in your vicinity.

Dennis "Clincher" Felt Weather Strip

The genuine "Clincher" Strip with the heavy ALL WOOL FELT, which is glued to the bottom of the moulding enables you to nail through both moulding and felt when applying the strip. This makes it the most practical and durable strip on the market. None other so well adapted for the duty it is expected to perform. Another case of SIMPLICITY in CONSTRUCTION being the best.

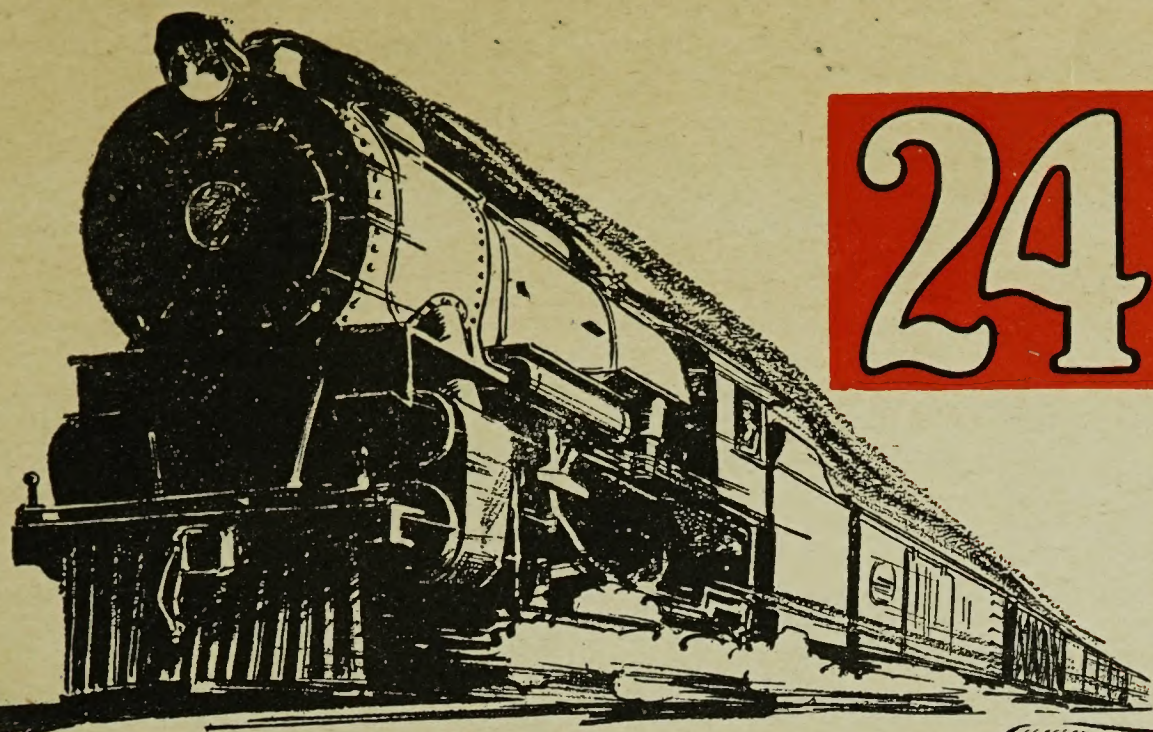

"Avoid imitations. The Original Dennis Clincher Felt Weather Strip has tag like this attached to each bundle of strip."

Accept No Substitute

Buy the Genuine Dennis Clincher Wood and Felt Weather Strip which has a yellow tag bearing our name and trade mark attached to each bundle.

Exactly similar to this illustration.

24 Hour service

The systematic arrangement of our vast stocks mean that your order will be filled **CORRECTLY** and **PROMPTLY**, regardless of how many items are specified.

24 Hour Service saves orders and profits for you when customers ask for items that have run low in your stock.

Our big new warehouse adjacent to the Chicago Junction Railway Terminal enables us to load out-going shipments directly into cars at our shipping room doors.

We are able to serve you promptly by maintaining a complete stock of all catalogue items ready to fill your rush orders.

We Pay the Freight

We Pay the Freight on shipments weighing 100 pounds from Chicago to any town within the boundary of Omaha, Duluth, Memphis, Tenn., or Portland, Maine. Outside of boundary an allowance of 50 cents per 100 pounds only will be made. No freight allowed on shipments weighing less than 100 pounds or on Express or Parcel Post orders.

K. D. WINDOW AND DOOR SCREEN FRAMES

The "Dennis" K. D. Screen Door Frame May Be Cut to Fit Any Standard Size Door Frame

The Dennis K. D. Screen Door Frame which has always been a popular seller, has been reconstructed and improved, as you will now note we are using, on all sizes, our patented 2-in-1 frame stock with removable screen bead attached thereto. Because of the comparatively small investment necessary to supply the demand of your customers for any standard size screen door they may require, this item should have your careful consideration.

They pay a good reasonable profit, are easy for customers to put together and make a strong, substantial door that will give years of satisfactory service. Made in two thicknesses of stock: $\frac{7}{8}$ and $1\frac{1}{8}$ -inch, to fit any standard door frame opening up to 46 inches wide and 96 inches long.

Style D Door Frames

Made from selected soft white pine, side rail $1\frac{3}{16} \times 2\frac{3}{4}$ -inch, top rail $1\frac{3}{16} \times 2\frac{3}{4}$ -inch, bottom rail $1\frac{3}{16} \times 3\frac{3}{4}$ -inch, cross or center rails $1\frac{3}{16} \times 1\frac{1}{16}$ -inch. Complete with 2 sets of 4 new style No. 22 galvanized screen door corner brackets.

Style A Door Frames

Description as above on Style D except that side rails are $1\frac{1}{8} \times 2\frac{3}{4}$ -inch, top rails $1\frac{1}{8} \times 3\frac{1}{2}$ -inch, bottom rail $1\frac{1}{8} \times 5\frac{1}{2}$ -inch, center rails $1\frac{1}{8} \times 1\frac{1}{16}$ -inch.

On both the Style A and Style D door frames side rails are bored and notched at center and bottom and cement coated nails are furnished, which makes them very easy to put together. Top part of frame and cross pieces may be cut off and any size door made and put together very quickly. Natural finish, D doors packed 1 dozen sets in a crate. A doors packed $\frac{1}{2}$ dozen sets in a crate complete with nails and corner brackets.

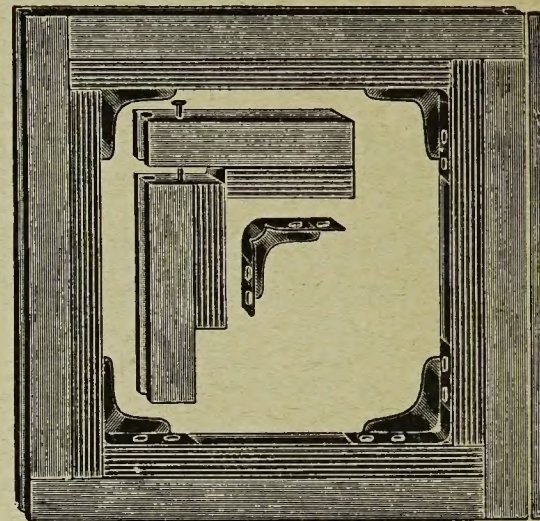

Average weight D door 115 lbs. per dozen.

Average weight A door 220 lbs. per dozen.

Size D 3x7-foot cut out of $\frac{7}{8}$ -inch stock makes frame up to 38 in. wide, 84 in. long. Price, per dozen sets, complete.....\$140.00
Size A 3x7 foot cut out of $1\frac{1}{8}$ -inch stock makes frame up to 40 in. wide, 84 inches long. Price, per dozen sets, complete.....\$200.00
Size A 3 $\frac{1}{2}$ x8-foot cut out of $1\frac{1}{8}$ -inch stock makes frame up to 46 in. wide, 96 in. long. Price, per dozen sets, complete.....\$250.00

D 3x7 Packed 1 Dozen in Crate. Both Sizes A $\frac{1}{2}$ Dozen in Crate

Perfection K. D. Window Screen Frame

The stock in our Perfection Knock Down Window Screen Frame is our patented No. 42 and No. 43 (2-in-1) Head and Side Rail, size $1\frac{3}{16} \times 1\frac{3}{4}$ -inch Clear White Pine as illustrated on Page 7. Screen bead cannot get lost or broken, saves 10% time in assembling.

The frames are put up natural finish, each set in carton, complete with No. 28 Slide, No. 22 Screen Corner Brackets, Nails, etc. It is the most simple Knocked Down Frame in the market to get together, and a most satisfactory and substantial frame when finished. Can be used on Window Frames with outside blinds.

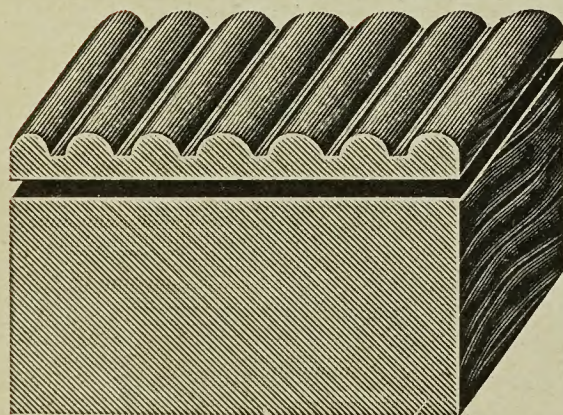

Sizes R-3060, R-3872 and R-4484 are furnished with cross bar to strengthen center of frame, but without Slidestick. In making up stock order for the above Knocked Down Frames, it is advisable to purchase a small quantity of No. 42 and 43 Head and Side Rail. Random lengths, illustrated on Page 7, to take care of odd-sized windows that cannot be made from the following sizes:

All sizes packed 1 dozen sets in fiber shipping containers. Each frame in separate carton. (Brackets, nails, etc., included.)

DENNIS (2-in-1) CUSTOM WINDOW SCREEN FRAME-MOULDING PATENTED

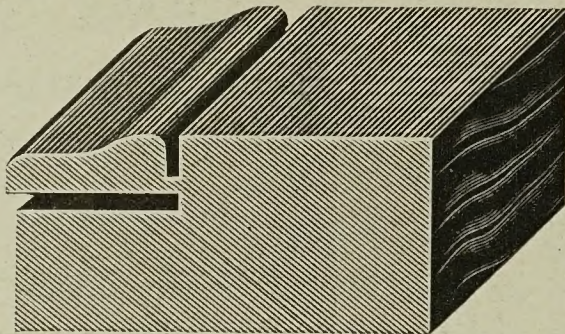

The new style DENNIS (2-in-1) Custom Frame Stock is made from clear White Pine. You will note the small screen moulding or bead is a custom pattern as used by manufacturers of the highest grade of window screens and that said new frame stock not only contains our patented (2-in-1) feature which enables you to cut down and make up the frame complete ready for the wire, at which time the small moulding or bead may be removed with the aid of a sharp knife, but in addition we have a new improved feature with the bead overlapping the edge of frame stock before it is removed. This added feature means that after the screen bead is removed it will fill the rabbet completely.

The (2-in-1) type of frame stock is covered by patent No. 1757706 in U. S. A. and 310024 in Canada, this new feature just described, which is only to be found on our new custom window screen frame moulding, as illustrated.

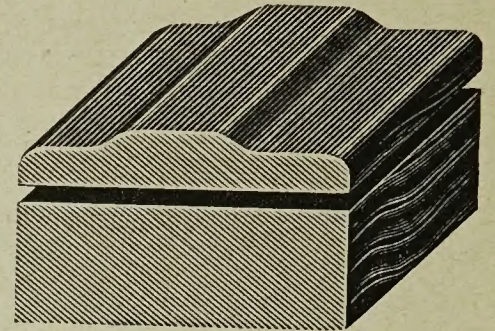

No. 52—Size $1\frac{3}{16} \times 1\frac{3}{4}$ inch. Clear White Pine (2-in-1) side rail, 10 to 16 foot lengths, 504 feet in crate. Weight, 125 pounds.

Dennis Custom K. D. Window Screen Frames

The stock in our new Dennis Custom K. D. Window Screen Frame is our patented No. 53 and 53 $\frac{1}{4}$ (2-in-1) beaded frame stock as illustrated above. The frames are made from selected Clear White Pine kiln dried and perfectly matched. Natural finish only. Each set in separate carton complete with No. 298 zinc rust-proof channel (see illustration page 2) which eliminates slide groove that weakens frame (makes screens slide easy, do not stick in wet weather) and the new style No. 13 Custom Screen Corner Bracket that fits flush with ends of screen bead in each corner on the face side of the screen, making a very attractive appearance and easily applied with flat head galvanized screws which are included. This new frame is simplicity itself to get together and a most satisfactory, substantial and attractive frame when finished. Can be used on window frames with outside blinds.

Made in All Sizes for Half and Full Size Frames as Follows:

Number.....	C-3030	C-3636	C-4242	C-4848
Makes sizes up to	30x30	36x36	42x42	48x48
Weight, dozen.	40 lbs.	50 lbs.	55 lbs.	60 lbs.
Price dozen....	\$46.00	\$49.00	\$57.50	\$65.00

For Full Length Window Frames as Follows:

Number.....	C-3060	C-3672	C-4284
Makes sizes up to.....	30x60	36x72	42x84
Weight, dozen.....	60 lbs.	72 lbs.	85 lbs.
Prize, dozen.....	\$75.00	\$85.00	\$95.00

All sizes packed 1 dozen sets in fibre shipping container, each set in separate carton complete with packages of hardware which includes nails for assembling the frame and corner brackets and screws complete. All sizes of frames for full length window screens come with cross bars to strengthen center of frame.

SCREEN FRAME MOULDING

Dennis Special (2 in 1) Window Screen Frame Moulding

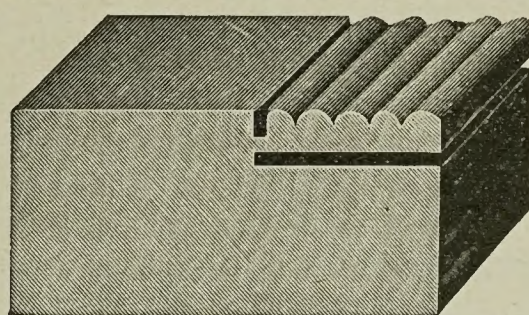

Patented—Patent No. 1,757,706 in U. S. A. and 310,024 in Canada

Window Screen Frame Moulding Saves Time, Labor and Money in Making Window Screen Frames

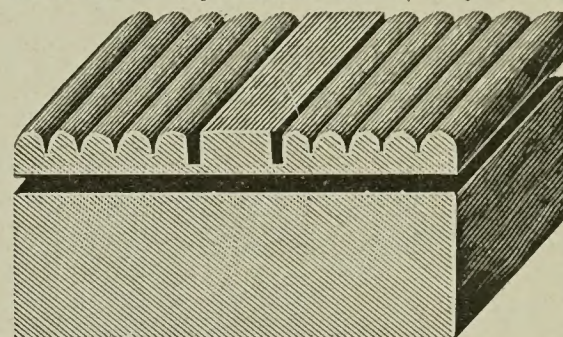

The Dennis new style (2 in 1) window screen frame stock is made of Clear White Pine. You will note that the small screen moulding or bead, as it is sometimes called, which covers the edge of the wire, is left attached to the frame stock which enables you to cut down and make up your frame complete ready for the wire, at which time the small moulding or bead may be removed instantly with the aid of a sharp knife, which not only saves considerable labor, but is also much more economical than the old style frame stock, as you will note that the (2 in 1) mouldings are sold complete with the screen bead attached.

No. 42—Size $1\frac{3}{16} \times 1\frac{3}{4}$ inches, Clear White Pine (2 in 1) Side Rail, 10 to 16-foot lengths, 504 feet in crate. Weight, 125 pounds.
Price, per 1,000 feet...\$170.00

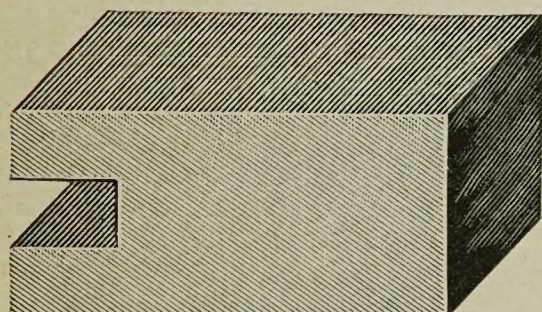

No. 43—Size $1\frac{3}{16} \times 1\frac{3}{4}$ inches, Clear White Pine (2 in 1) Head Rail, 10 to 16-foot lengths, 504 feet in crate. Weight, 125 pounds.
Price, per 1,000 feet...\$170.00
No. 43 $\frac{1}{2}$ —Same as No. 43, only size $1\frac{3}{16} \times 2\frac{3}{4}$ inches, Clear White Pine (2 in 1) Head Rail, 10 to 16-foot lengths, 252 feet in crate. Weight, 95 pounds.
Price, per 1,000 feet...\$250.00

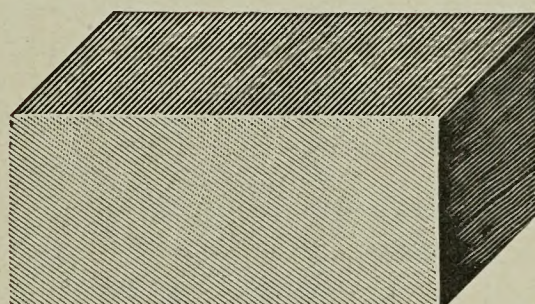

No. 43 $\frac{1}{4}$ —Size $1\frac{3}{16} \times 1\frac{3}{4}$ inches, Clear White Pine (2 in 1) Center Rail, like No. 43, only has screen bead on two edges, 10 to 16-foot lengths, 252 feet in crate. Weight, 60 pounds.
Price, per 1,000 feet...\$180.00

K. D. METAL SCREEN FRAME STOCK

Illustrated below are one-piece steel cadmium plated (rust-proof finish) corner brackets.

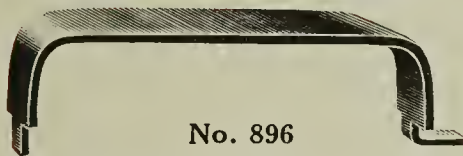

No. 990 is a welding bracket to spot-weld in bottom of spline channel at corners to make frame more rigid.

No. 992 is a one-piece corner bracket. Packed in bulk.

No. 993 is a one-piece corner bracket with spring pin attached, made rights and lefts for swinging or tilting screen to be used on casement sash. Packed in bulk.

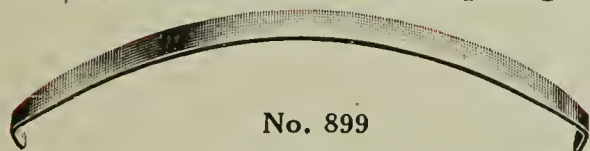

Solid Brass Screen Lifts

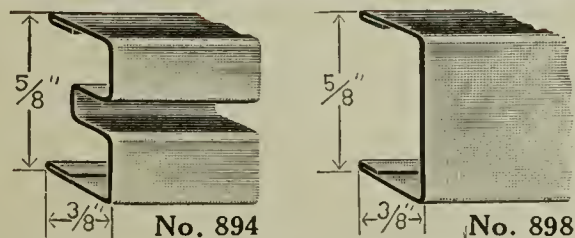

No. 896, size $3\frac{3}{4}$ inches long x $\frac{5}{16}$ inch wide. Solid brass lacquered. Packed in bulk.

Steel Cadmium Plated Spring

Steel cadmium plated (rust-proof) springs for all metal frames. Width $\frac{5}{16}$ inches, length 4 inches.

U and Rib Zinc Channels for Steel Frames

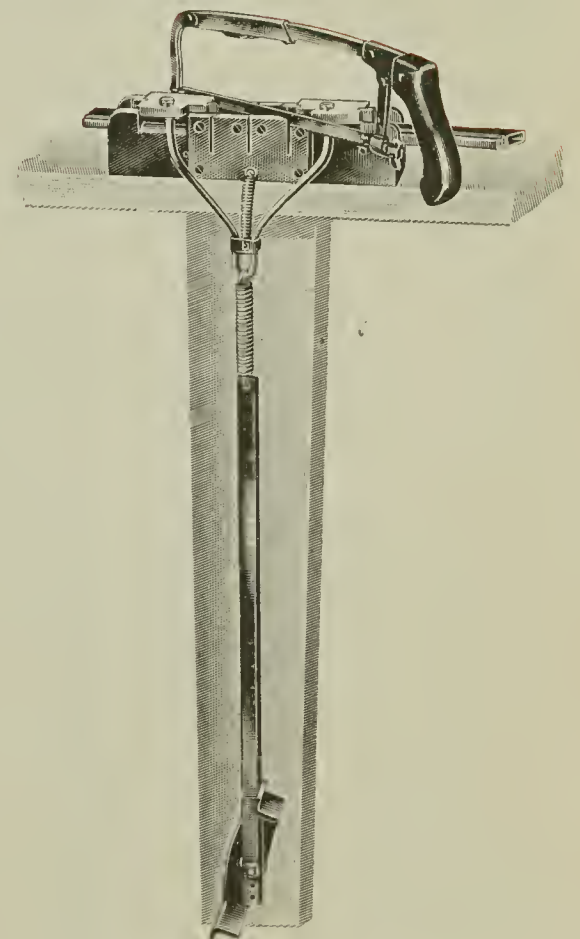

No. 894 Rib Channel made of zinc, and No. 898 U Channel made of zinc can be supplied in lengths, 24", 26", 28", etc., up to 96". Standard stock lengths 2½', 3', 3½', 4', 5', 6', 7' and 8' for use on screens with spring attached to slide up to top or bottom of frame so that screen can be used either for upper or lower sash.

All Metal Mitre Box

The All Metal Mitre Box with foot lever attachment illustrated at right, will quickly and easily mitre the All Metal Frame Stock, making a clean, true mitre. Stock is readily cut to length desired as spring foot lever attachment holds stock rigidly in place while frame stock and spline are being cut in one operation by hack saw. After cut is made stock is immediately released by reverse kick on the foot lever.

This Metal Mitre Box not only cuts clean, true mitre, but is a big time saver in cutting up metal stock and spline.

STORM SASH AND SCREEN HANGERS

Patented—Patent No. 922,720

Full Size of No. 1 Hanger

E-Z Way Screen and Storm Sash Hanger For Whole and Half Screens, Storm, Sash, and Basement Windows

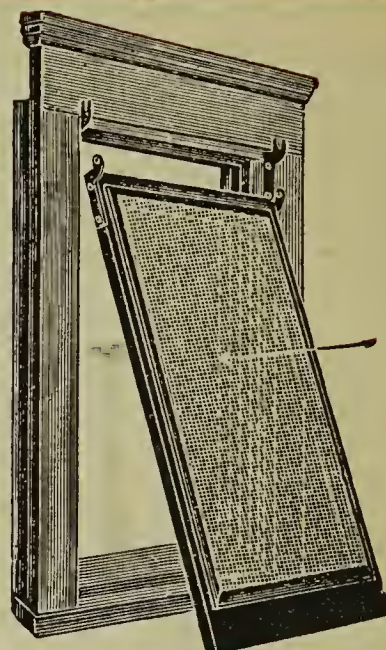

Requires no cutting or measuring to apply. The top and back of E-Z Way Hangers are squared to fit top and back of screen and window casing, as shown in illustration at right. Note the simplicity and durability of construction of the "E-Z Way" Hangers. It is absolutely impossible for screens to bind or stick when hung with the "E-Z Way," and the hanging may all be done right from the inside of the house, a great advantage in hanging screens or storm sash on second and third floor windows. Can you imagine any easier-way?

	Weight per Gross Set	Price per Gross Set
No. 1 —Galvanized, for 1-inch casings.....	30 lbs.	\$ 84.00
No. 2 —Galvanized, for 1¼-inch brick moulding..	38 lbs.	90.00

Price, per gross sets of four. . . \$50.00

No. 22C, or cartons, containing 1 set No. 22 brackets and nails, sufficient for one screen frame. Three dozen cartons in container. Weight, 7 pounds.

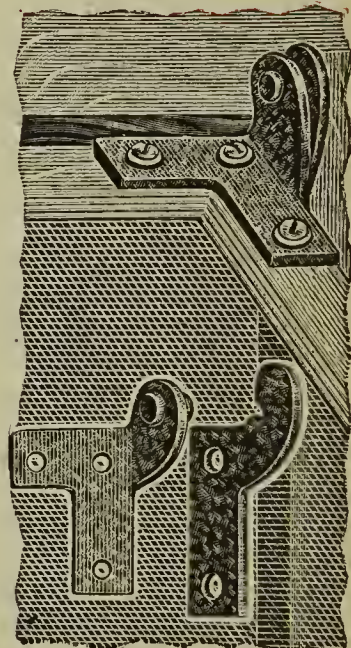

Price, per gross cartons. . . \$75.00

New Style No. 4 E-Z Way Screen Hanger

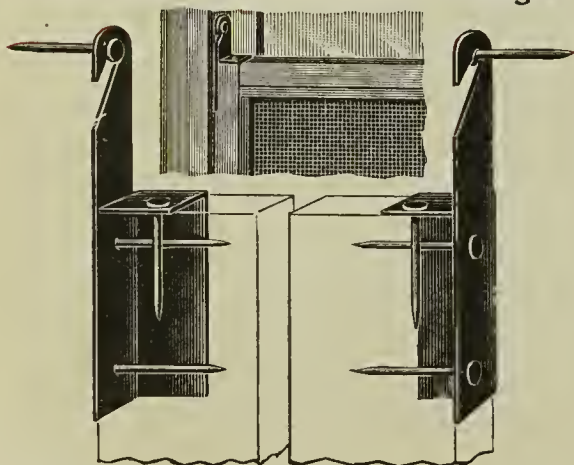

The No. 4 Combination Window Screen and Storm Sash Hanger and Corner Brace combined is most easily applied by nailing the female part of hanger flush with the blind stop and flush with the top of frame. Then attach the male part of the hanger to the window screen or storm sash, flush with the top edge on the outside, and if screens or storm sash have been properly fitted before the hangers are applied, they should then hang properly, and the application is made without the necessity of taking measurements. See illustrations. On screens or sash thicker than 1½ inches, female part of hanger will have to be set away from the blind stop a sufficient distance to take care of the added thickness to make the screen hang properly. Made from 16-gauge galvanized steel, packed complete with screws and nails. One dozen sets in carton, 6 cartons in fibre shipping container. Weight, 22 pounds.

Price, per gross sets. . . \$100.00

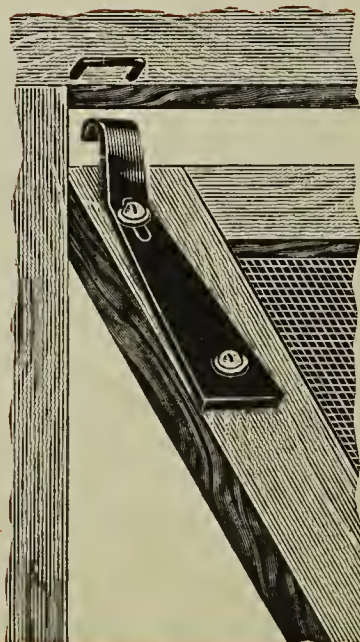

No. 6 Dennis Half Screen Hanger

No. 6—Dennis Half Screen Hanger, made of galvanized steel. Applied to upper inside corner of screen like cut. This does away with ¼x7/8-inch top strip used in connection with other half screen hangers. Packed 1 dozen pairs in carton, complete with nails. Weight, per gross, 48 pounds.

Price, per gross pair. . . \$60.00

Competition Half and Full Size Screen and Storm Sash Hangers

No. 7—Hangers are made from 16-gauge steel, black duco finish, with galvanized wire staples, 1¼ inches long. Three dozen pair in box, complete with screws. Weight, 30 pounds per gross.

Price, per gross. . . \$45.00

The No. 8 Half Screen Hanger is better to use on Half Screens than slide, as screen never sticks when painted or in wet weather; made from 18-gauge galvanized steel. Size of hanger, 5/8x4 inches. Packed 3 dozen pair in a box, complete with flat head nails to apply hanger to half screen and galvanized nails upon which hanger swings. Weight, per gross, 12 pounds

No. 8B—Packed bulk, 3 dozen pair in box. Price, per gross pairs. . . \$40.00

No. 8E—Packed 1 pair in envelope with nails, and 1½-inch gate hook and eye. Price, per gross pairs, . . . \$54.00

Brass Numeral Tacks

No. 799 Screen or Numeral Nails

Our method of packing the above nails, 25 on a block, enables you to fill a large or small order with a very small stock (for example) if you have in stock 2 blocks of each A, B, C and D, you can fill an order for 100 numbers in duplicate or any part of a dozen small orders as follows: Jones wants numbers for 8 screens, sell him 1 to 8 in duplicate. Smith wants numbers for 25 screens, sell him 9 to 34 in duplicate. Johnson wants numbers for only three screens, sell him Nos. 35, 36 and 37 in duplicate. In this way the entire 100 numbers may be used for one or a dozen orders.

Nails are 25 on a block, 1 dozen blocks in carton, 4 different assortments as follows:

A Window Cleaner for Professionals

A Window Cleaner for Professionals. All metal parts, including bolts, are solid brass. Patent drip prevents water from dripping down the handle. Handles are extra long and locked together at point of contact with the wood pole. Contains 3 layers of Red Pure Gum Rubber (makes 3 Cleaners in one). When first rubber wears out it may be clipped off and the second rubber used; also the third, and when all the 3 rubbers are worn out, new rubbers may be inserted at a minimum cost. Handle and blades that hold rubber and the bolts are made of brass and cannot rust or corrode. Guaranteed to give perfect satisfaction.

W.J. DENNIS & COMPANY Chicago

IDEAL RUBBER WINDOW CLEANERS

THE NEW SURE-GRIP IDEAL RUBBER SQUEEGEE FOR PROFESSIONALS

Packed in Individual Carton

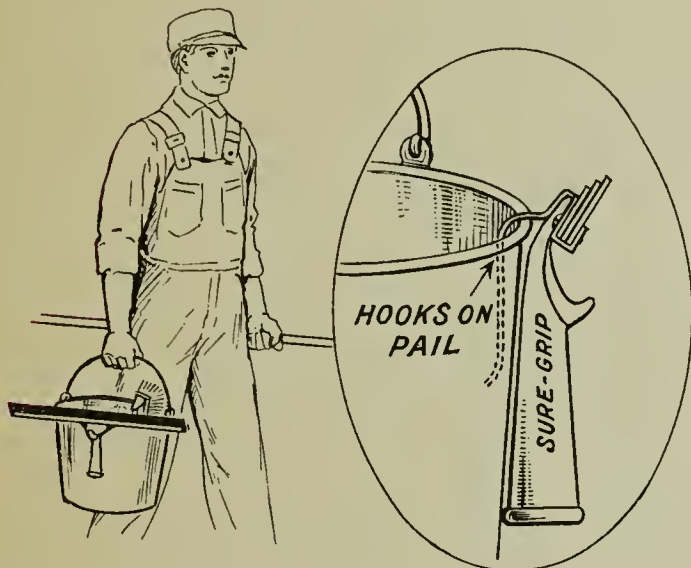

Triple Cleaning Blades

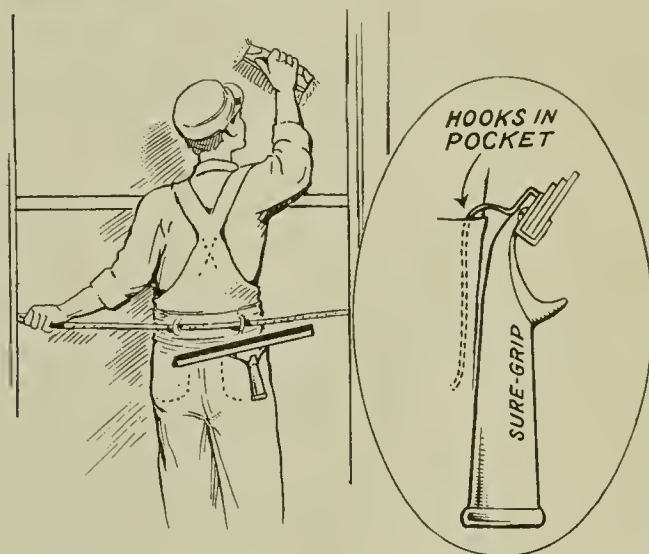

Money can't buy a finer quality than the white seal rubber used in the Sure-Grip Squeegee. Nothing better is made. Rubbers are triple $\frac{3}{32}$ " thick, making a durable, strong cleaning edge. Rubbers when worn out can be replaced at a minimum cost.

Frame, Handles and Clip

The metal used in the frame, handle and clips is solid brass, burnished and lacquered. Blade is one-piece construction for added strength and improved appearance, and it keeps the cleaning edge true by preventing the rubbers from working back between the screws.

No. 95—18-inch Rubbers have 11 holes, and are interchangeable with other cleaners of this size.

POINTS OF MERIT

- No. 1**—Solid brass one-piece blade construction gives added strength and prevents the rubbers from working back out of true between the screws.
- No. 2**—Triple rubber construction doubles or triples the life of the cleaner, as when first rubber wears out it can be clipped off and second rubber used. Also third rubber. When all three rubbers wear out new rubbers can be inserted in blade.
- No. 3**—Spring hook on top of handle is convenient for holding cleaner in belt or hip pocket when not in use. Can also be used to hold cleaner on side of pail. This keeps the rubber out of the water in pail, as water containing ammonia or other compounds mixed with the water to help window washing operations, has a tendency to destroy the usefulness of the rubber quickly.
- No. 4**—The Sure-Grip Finger Hook Attachment prevents the finger from coming in contact with sharp edges of stamping or casting, and acts as a sure-grip to prevent cleaner falling from hand while in use.
- No. 5**—Ferrule end of handle that engages the pole positively prevents spreading.

No. 95.—Sure-Grip Professional Squeegee Price List

IDEAL RUBBER WINDOW CLEANERS

No. NINETY-NINE BLUE-BILL WINDOW CLEANER

Superior
Construction

"BLUE-BILL"

A Bird for Work

All Parts
Interchangeable

Cleaning Blades

Money can't buy a finer quality than the "Blue Seal" rubber cleaning blades used in BLUE-BILL. Nothing better is made. Double rubbers $\frac{3}{32}$ inch thick provide a durable, strong cleaning edge. When the first rubber is finally worn out it can be clipped off and the second rubber used. Later, both rubbers can be replaced at a minimum cost.

Steel Handle

Extra heavy steel stamping, blue duco finish, and bearing Dennis trademark to identify it as finest quality construction. Outer end is locked together at point of contact with pole, to prevent spreading.

Solid Brass Frame

The metal blades, or frames, are made of solid brass, burnished and lacquered. The top blade is "L" shaped to give added strength and keep the cleaning edge true by preventing the rubbers from working back between the screws.

The bottom blade is $\frac{1}{8} \times \frac{1}{2}$ inch flat brass, lacquered and having holes threaded to take flat head solid brass screws, countersunk in the top blade.

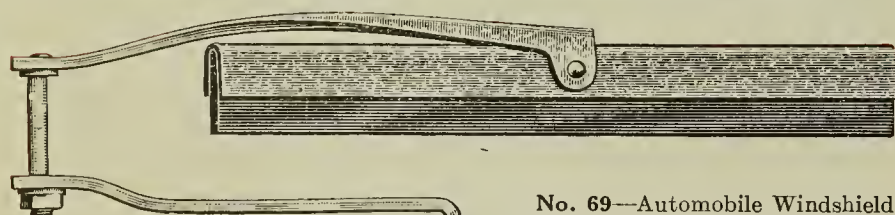

Blue-Bill is unquestionably the last word in fine cleaner construction, combining all of the newest and best features developed by the leading manufacturers of quality squeegees.

No. Sixty-Nine Dennis Windshield Wiper

Satisfaction guaranteed. Packed 1 dozen in carton. Weight, 3 lbs. Price per dozen.....\$15.00

No. 69—Automobile Windshield Wiper. Made from steel, frame japanned, blade containing rubber, galvanized. Rubber $\frac{3}{32}$ inch thick. Very substantially constructed.

Dripless Dryer Window Cleaner

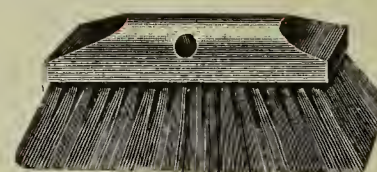

Dripless dryer cleaner is a combination window washer and dryer. It does away with the necessity of a window brush, sponge or wash rag. Simply dip the felt strip into water and rub the window as you would with brush or rag. This strip is full 1 inch wide and runs full length of the cleaner, as shown in illustration. Made of soft, porous felt that absorbs and holds water without dripping; securely fastened into galvanized iron frame. Cannot work loose.

The entire frame and handle is of galvanized iron, dryer part is fitted with $\frac{1}{8}$ inch pure gum double rubber and galvanized drip catcher. Packed 1 dozen in box. Average weight per dozen, 7 $\frac{1}{2}$ pounds.

DENNIS SOLID BACK STEEL WIRE BRUSHES

How They Are Made

We recommend our line of Solid Back Steel Wire Brushes as the very best in the market. The wire is set in a solid back and every tuft (tuft is the numerous strands of wire going into each hole) is individually riveted by patented process into each hole with a heavy flaring copper staple that is impossible to loosen.

In a brush made with a two-piece back (which is necessary with other processes of manufacture) the user seldom gets over 50 per cent wear and in many instances only 25 per cent, when the top cap breaks from the two or three screws or nails holding this $\frac{3}{8}$ of an inch cover, making the brush absolutely worthless, as its mission is to hold the wire in place.

Steel

Wire

Brush

Assortment

1½ Doz.

Here is a big selling assortment of solid back wire brushes that gives you a small stock of the most popular sizes for a very small investment. Each brush is fully described on this and opposite page.

Assortment consists of 4 each No. 2801 painters' scrubs, 2807 shoe handle, 2904 bent handle scratch and 2 each 2804 curved back, 2901 painters' dusters, 2701 butchers' scrubs. Total, 1½ dozen in box.

Assortment No. 2600—Weight, 11½ lbs. Price...\$0.00

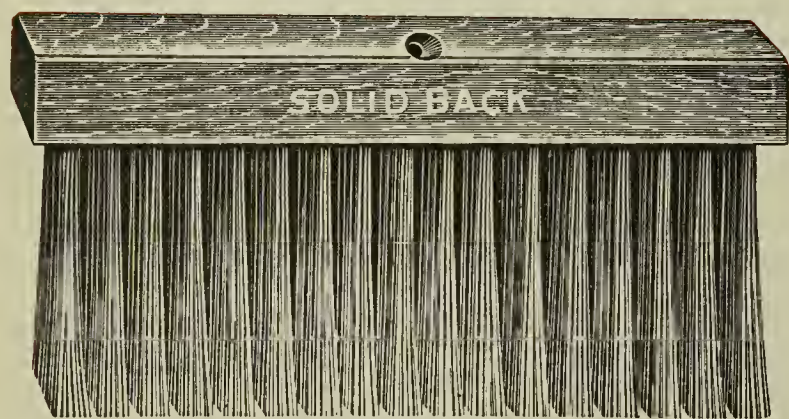

100 Per Cent Service

The solid back has no cover cap or screw to loosen, therefore insures 100 per cent wear.

Another advantage of this brush equal to the solid back feature is the uniform quantity of wire in each hole—other brushes may have just as much wire (in pounds) as the solid back, but vary so terrifically in the holes; some holes having 6 or 8 wires, others 30 to 40 and the user suffers. If he is doing fine work the large quantity of wire in a few holes makes them very stiff and will scratch badly. If he is doing heavy, coarse work, then the few holes with the overload of wire are doing the work and the lighter holes are useless, as there is not enough wire in them to produce results.

In the **solid back** every hole has the exact number of wire claimed, enabling fine work to be done without scratching, and in coarse work every hole does its share over the entire surface.

Solid Back Street Brooms

Flat Wire

We recommend this broom very highly for barn use, as it will thoroughly sweep up wet hay, straw or manure. For spreading asphalt, broken stone or gravel on streets or tarred roofs, this broom will be found practical and a time saver.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2704	4x16	060x017	14x2¼	5 in.	10	33 lbs.	\$75.00

Handled Butchers' Scrubs

Flat Wire

Our Solid Back Butchers' Scrubs will quickly and thoroughly clean butcher's blocks, and the heavy flat wires are so inserted that a gentle tap will remove all grease and other matter, making them both sanitary and durable.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2703	8x12	120x017	9x3½	1½ in.	6	18 lbs.	\$44.00

Solid Back Stone Cleaner

Flat Wire

For cleaning and scrubbing stone of any kind, also a good all around brush for any work required of a heavy wire brush.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2705	5x10	060x017	7¾x2½	2 in.	10	10 lbs.	\$26.00

Unhandled Butchers' Scrubs

Made in the same way as our handled scrubs described above. Because of its size and shape, this brush will be found useful for any purpose a wire brush is used for in addition to cleaning hutchers' blocks.

Flat Wire

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2701	5x10	120x017	7½x2½	1¼ in.	6	9 lbs.	\$22.00

W. J. DENNIS & COMPANY Chicago

"DENNIS" SOLID BACK

STEEL - WIRE - BRUSHES

Kettle or Scrub Brush

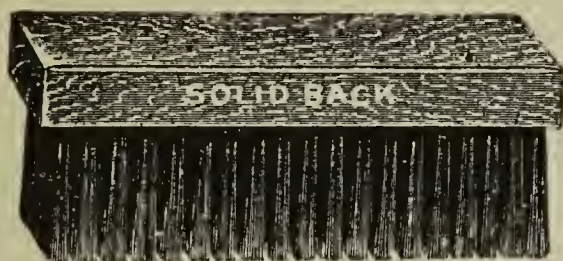

Round Wire

For cleaning and scouring pots, pans, kettles, bath tubs, closets, etc. A handy brush for all around household use.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Price, dozen
2805	5x8	28	3x1 $\frac{5}{8}$	1 $\frac{1}{4}$ in.	14	\$9.60

Solid Back Painter's Scrubs

For cleaning and removing blisters, etc., on outside work before painting. Also for sanding down old paint or varnish of finished woodwork. Does much faster and smoother work than sandpaper. 1 dozen in box.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2801	6x19	33	7 $\frac{1}{4}$ x2	1 $\frac{3}{4}$ in.	28	8 lbs.	\$17.50
2802	6x19	33	7 $\frac{1}{4}$ x2 $\frac{1}{4}$	1 $\frac{3}{4}$ in.	32	8 lbs.	21.00

Curved Back Painter's Scrubs

These brushes act in a similar manner as grains of No. 1 sandpaper. The curved face concentrating the energy into one place, produces more rapid results than are possible with a flat surface brush. 1 dozen in box.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2803	6x20	33	7x2 $\frac{1}{4}$	1 $\frac{1}{8}$ in.	44	7 $\frac{3}{4}$ lbs.	\$26.00
2804	9x21	33	7x2 $\frac{3}{4}$	1 $\frac{1}{8}$ in.	32	9 lbs.	30.00

Shoe Handle Painter's Scrubs

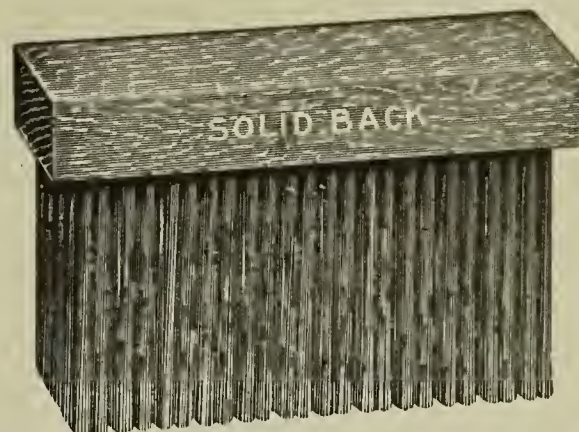

Round Wire

For sanding and cleaning narrow surfaces on mouldings, furniture, etc. The No. 2806 is also used for removing solder and other substances from files. 1 dozen in box.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2806	2x17	33	5 $\frac{1}{8}$ x8 $\frac{3}{4}$	1 $\frac{1}{4}$ in.	26	2 $\frac{1}{2}$ lbs.	\$14.50
2807	4x16	33	1 $\frac{1}{8}$ x10	1 $\frac{1}{4}$ in.	40	4 $\frac{1}{2}$ lbs.	18.50

Solid Back Foundry or Casting Brush

These brushes are used almost exclusively by foundries and iron and steel workers, but they may be used to good advantage for other purposes.

The shorter wire is especially adapted for scouring and scrubbing stone and metallic surfaces, such as boilers, engines, etc. They are particularly useful in removing paint blisters from structural steel work which has been in use for a long time, and the paint has become hardened.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2811	4x12	060x017	7 $\frac{1}{2}$ x2 $\frac{5}{8}$	4 in.	10	12 lbs.	\$26.00

Solid Pack Painter's Dusters

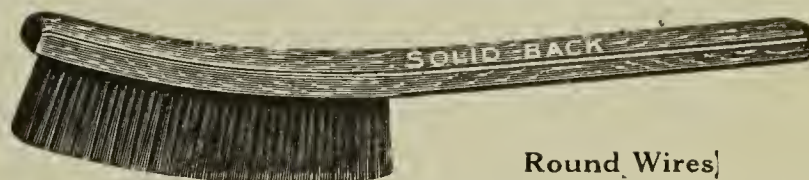

Round Wires

A fine brush for applying paint and varnish removers, and for cleaning moulded casings, etc.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2901	4x8	35	2 $\frac{1}{2}$ x1 $\frac{1}{16}$	2 $\frac{1}{2}$ in.	52	2 $\frac{1}{2}$ lbs.	\$21.50

Solid Back Bent Handle Scratch

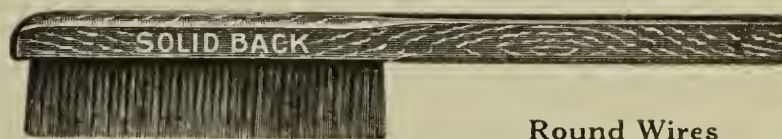

Round Wires

A Brazier's cleaning brush, also effective for cleaning crevices, grooves, mouldings, chimneys, stoves and pipes. Packed 1 dozen in box.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2904	3x17	33	3 $\frac{1}{4}$ x14	1 $\frac{3}{8}$ in.	36	4 $\frac{1}{2}$ lbs.	\$15.00
2905	4x17	33	1 $\frac{1}{8}$ x14	1 $\frac{3}{8}$ in.	56	5 $\frac{1}{4}$ lbs.	18.00

Solid Back Straight Handle Scratch

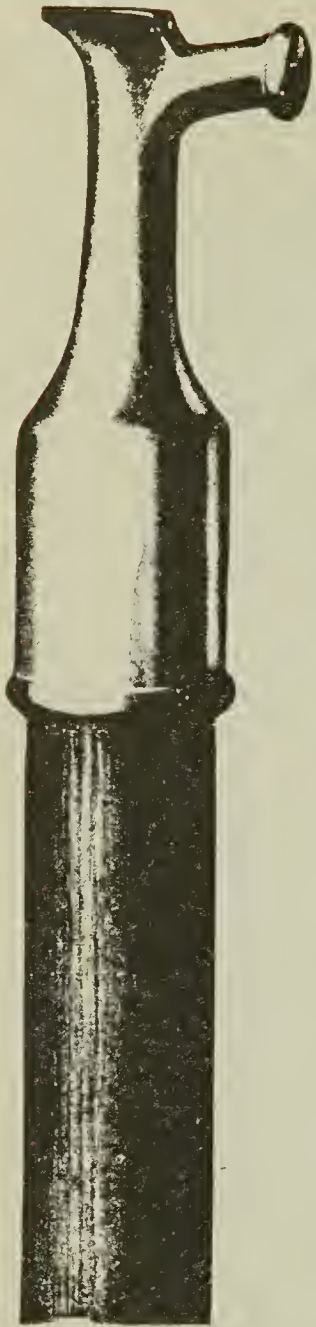

Round Wires

This brush has straight handle, otherwise is same as No. 2904, only is one row wider, but is used for the same purpose. 1 dozen in box.

No.	No. of rows	Gauge of wire	Size of back	Length of wire	Wires in each hole	Weight per doz.	Price, dozen
2906	4x17	30	1 $\frac{1}{8}$ x16	1 $\frac{1}{4}$ in.	36	5 $\frac{1}{2}$ lbs.	\$18.50

Window Poles for Office or Home

No. 6. Plain Improved Hook.

DENNIS Window Poles are the very latest designs, made to meet the requirements of every type of window that must be raised or lowered. The RUBBER CUSHION feature makes breaking windows an act of pure carelessness on the part of the person opening or closing the window.

Light and Strong—Easily Handled

Offices, factories, institutions and apartments all find that this improved window hook gives them perfect control over all type of windows large and small and the pure gum rubber cushion eliminates cracked and broken windows and marred woodwork.

The design and finish of Dennis Window Poles harmonizes with the equipment of the most modern offices. Special wood finishes can be applied to the poles when desired to match office furniture.

Handles in various lengths, from four to ten feet in length, are carried in stock ready for immediate shipment.

All sizes of Pull Down Poles carried loose in stock, shipped tied in bundles.

Specify No. 5 Hooks when wanted, otherwise No. 6 Hooks will be shipped on all lengths of window poles.

Rubber Cushions
Equip your old window hooks with these rubber cushions. Write for details.

No. 5. Rubber Cushion Hook.

March 1, 1933.

TO THE TRADE:

Weather Strip prices on the following pages, Nos. 28, 29 and 30 are the prices (with few exceptions) that have prevailed during the 1932 season. These same prices will apply on all weather strip shipped up to July 31st, 1933, and at these same prices we will accept your order for Weather Strip for the coming fall season for September First shipment with October First dating.

The advantage of placing your order now at these prices is that, you are protected against any advanced prices that may appear in our 1933 fall catalog issued August First next.

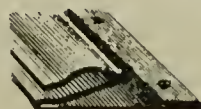

It is fully understood that these prices are guaranteed against our own decline, which means that if we do reduce prices on some items August First to bring them more in line with costs of raw material prevailing on that date, we will, in that event, give you the benefit of these new reduced prices when your order is shipped.

Place your order now. We will give you the benefit of any reductions made August First, and in the meantime you are protected should advances occur.

Yours very truly,

W. J. DENNIS & COMPANY.

No 6000

Bow Tip Double Hemmed Bronze

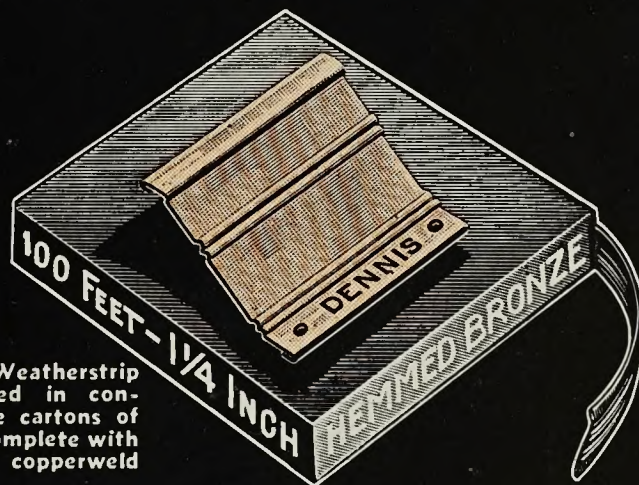

Patented reinforced bow tip assures true contact against sash or doors to eliminate drafts, rain, dirt and noise.

Patented double bead thru center of strip prevents vibration, rattling and buckling.

Tacking flange has perforated holes ready for nailing.

Patented double bead above perforated tacking flange is for ease of application, an awl used to raise contact edge cannot slip.

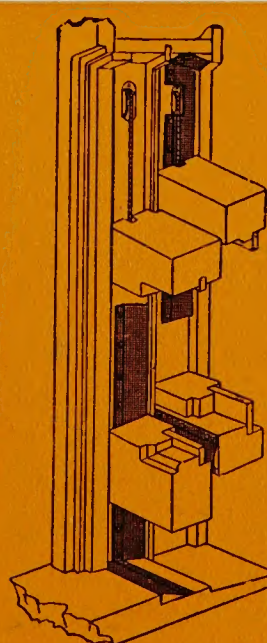

No. 6000 Weatherstrip comes coiled in convenient size cartons of 100 feet, complete with rust-proof copperweld nails.

Made, patented and sold
exclusively by

W. J. DENNIS & CO.
2110-20 WEST LAKE ST.
CHICAGO, ILL.

DIRECTIONS

Apply the strip to the frame to close in between the edge of sash and frame, or edge of door and frame. After applying, the contact edge can be raised by bringing the point of an awl or screw-driver down the double bead above the nailing flange. The harder you press, the more it will raise.

These cuts illustrate the No. 6000 Double Hemmed Bronze Weatherstrip applied to sides of upper and lower sash, sides and top of doors and check rail at center of sash. No. 73 Brass and Felt Door Bottom applied to bottom of door.

Make Your Own Screens and Save Half the Cost

Dennis "Perfection" K-D Frames
Are Ready-Cut and Easily Put Together

Each Set is complete with brackets, nails, slide sticks and full directions for quick assembling.

Made of Selected Clear
White Pine. They
Fit Perfectly

Only "Perfection" frames have the patented 2-in-1 mouldings that are so easily put together. Your saw cuts both frame and screen bead at one time. No extra pieces to buy. No waste. Saves time and cost.

Dennis "Perfection" Frames
are ready-cut in all sizes for
Windows and Doors
